

# THE CHAMPION CHRONICLE

VOLUME 17

CHAMPION, (ALBERTA) THURSDAY, March 5, 1936

NUMBER 45

## Jock's Waggin' Tongue

Vol. 1 Thursday, March 5, 1936 No. 43

Published in the interest of the residents of Champion and District.

A Bear for Hard, Steady Work, a simple Compact Farm Power Unit. Cold weather, or hot, rain or shine, it's all the same to the new McCormick Deering 14 to 24 h. p. engine. In cold weather a fully enclosed rotary-type Win magnet permits easy starting, and in hot weather a depend water cooling system keeps the engine from becoming "run red and running hardware merchants."

The weather is fine, so why not get that grain fanning and treating job done. We have your requirements of Copper Carbamate and Dorr's when you need a reliable and effective, them out of the stove? Stormy weather, block the Champion Boaster and roads or lack of time stub are working, and may hinder you from we think making something in to town—but progress. They are going that won't stop the ing to have all the WinPower from change.

"Your Hardware Merchants"

## Chinook Brings Welcome Relief

At last on Saturday the welcome chinook struck this district to start the snow melting. It was a decided change after what we had been having. Sunday water was running in every direction with ponds forming in all the low spots, stock as well as human beings appreciate the relief from the cold. But early Tuesday morning the wind veered round the north again bringing a slight flurry of snow and about 12 degrees of frost, enough to harden up the roads and allow the water to seep away before more snow began to melt. March has come in like a lamb whether it goes out the same way or not, it is a pleasant change.

E. Cemelini was elected by acclamation as councillor for the village of Champion, at nomination meeting held Monday, March 2nd.

## Obituary

Mrs. E. B. Siler received the sad news of the death of the husband of her only sister, Goldie, Joe St. Amour of Kamsel, Mont. who died on February 17th.

The sympathy of Champion and district is extended to Mr. and Mrs. L. Groves in the loss of their infant son (twin), two months old, on February 28th. The funeral was held from 2 to 4 o'clock Tuesday afternoon.

The many friends of Mr. and Mrs. H. Bradford formerly of Champion, will be sorry to hear of the death of their only child, Ben, in Scranton, Penn., January 17th.

Mrs. Annie Amelia Zang of Calgary, formerly of Champion, passed away in Calgary Sunday morning, March 1st. Besides her husband she is survived by three daughters, Mrs. J. Meibum, Champion, Laura and Alberta, at home; five sons, William and Harvey, of Calgary, Jewel and Walter, at Cochrane, and Ernest of Topland, Alberta; a sister, Mrs. Mary Webber, of Vancouver; and three brothers in Ontario.

## "Major Bowes" Amateur Night

The unavoidable postponement of "Major Bowes' Night," due to the weather and roads, has given our local amateurs a month longer in which to perfect the preparation of their selections. This will assure a programme of a particularly high calibre. The rural districts round about are well represented among the entries, and the town of Champion, is, of course, doing its part.

A one-act play "Pros and Cons" will provide an interlude in the competition.

Plan to attend this enjoyable evening—Friday, March 13th, at 8 p.m. in the Community hall. Admission 35c and 15c.

## Next W. I. Meeting

The Women's Institute for March is to meet at Mrs. Farrie's on the 10th.

Roll Call—Don'ts for the Sick Room.

Address by Miss Rae, R. N. Current Events—Mrs. Wilkenson.

Refreshments—Mrs. Leiff. Members wishing to serve for the hospital please call at Mrs. Alexander's for the materials, any time.

## Look Before You Leap, Girls!

1936 is Leap Year. There was a severe slump in the marriage mart during 1935. 1936 gives the ladies the privilege of proposing without losing face.

Ladies, we have no objection whatever to your proposing but don't forget the prerogatives that go with it.

As well as asking for his hand and heart you will get the privilege of running after your sweetie and buying his candy and cigarettes, as well as buying the tickets to movies and dances. Gasoline of course is given away to couples in love, and the tickers of the car is merely trivial—perhaps your mother will stand for that.

We are willing to put a few things away in our hope chest and might persuade our friends to put on a shawl or two for our benefit. We will get a few pots and pans ready, but we expect you to have a home ready to move into, and a honeymoon of course is in order. Where we will go depends on the size of your pocketbook honey, and regarding an engagement ring, some of us don't care for a diamond smaller than a pea. The expenses of the ceremony will have to be looked after, and as long as you have a steady job, we don't mind you proposing. We don't wish to break your hearts by refusing our hands but look before you leap, even if it is 1936. —Ex.

## Lethbridge Experimental Letter

Feeding Dairy Calves

At this Station calves are born during nearly every month of the year and so are reared under all sorts of weather conditions. It has been found that fall-dropped calves have some advantage over those born in the spring in that they are not hampered by summer heat or flies, more time can usually be given to their care and by spring they are sufficiently developed to make use of pastures. On the other hand spring calves are raised with almost equal success providing the calves have access to a cheap but clean

## Oldest European Discovery Against Stomach Troubles and Rheumatism Acclaimed Best by Latest Tests

Since 1759 thousands of people have regulated their normal health after years of suffering from stomach troubles of all types, such as constipation, indigestion, gas, and sour stomach which are the basic factors of such maladies as high blood pressure, rheumatism, periodic headaches, pimples on face and body, pains in the back, liver, kidney and bladder disorder, exhaustion, loss of sleep and appetite. Those sufferers have not used any man-made injurious chemicals or drugs of any kind; they have only used a remedy made by Nature. This marvelous product grows on the highest mountain peaks, where it absorbs all the healing elements and vitamins from the Sun to aid HUMANITY in distress.

It is composed of 19 kinds of natural leaves, seeds, berries and flowers scientifically and proportionately mixed and is known as LION CROSS HERB TEA.

LION CROSS HERB TEA tastes delicious, acts wonderfully upon your system, and is safe even for children. Prepare a fresh like any ordinary tea and drink a glassful once a day, hot or cold.

A one dollar treatment accomplishes WONDERS; makes you look and feel like new born. If you are not as yet familiar with the beneficial effects of this Natural Remedy LION CROSS HERB TEA try it at once and convince yourself. If not satisfactory money refunded to you. Also in tablet form.

Try it and convince yourself with our money-back guarantee.

One week treatment \$1.00 Six weeks treatment \$5.00 In order to avoid mistakes in getting the genuine LION CROSS HERB TEA, please fill out the attached coupon.

## A Pot Of Gold?

It is said that people learn by experience. True, undoubtedly, but one wonders sometimes just how much experience is needed for some people to learn some lessons.

In illustration one might cite the well established axiom that "there is no royal road to wealth." Experience, reaching back for centuries has amply proved the truth of this assertion but the lessons of the past do not appear to be very deeply engraved on a good many human minds, or if the truth of the statement is admitted and recognized, it is quite frequently ignored or blindly waived aside.

Why is it that so many people are easy to convince, against all the laws of sound economics, in defiance of recorded history and experience, in opposition to their own inherent common sense, that there is a pot of gold at the end of the rainbow to be had merely for the catching?

Why is it that people of fair education, people who are well read, people who usually apply good sense in the pursuit of their daily avocations and even demonstrate shrewd ability in ordinary business transactions, fall an easy prey to the lure of financial fables, confidence tricksters and unscrupulous sharks?

There can be only one answer to these questions and that is that people of ordinary intelligence and acumen who succumb to the wiles of the tricky financial gangster and invest hard earned savings in wild projects and doubtful schemes have permitted blind, unreasoning hope to supplant judgment and common sense. In other words, the desire to get something for nothing or to acquire a lot from a little is allowed to over-ride good sense. The inevitable result of such lapse is disastrous speculation in schemes in which every card is stacked against the player.

And once the victim has allowed himself to be lured into the net by promises of huge returns and great rewards it is astonishing how reluctant he is to admit even to himself that he has been ensnared even after the truth is revealed in unpleasant starkness. The net in which he is caught is made of golden meshes and rather than credit anything else he is ready to believe the most impossible stories and back up his faith by sending good money after bad until he is ultimately strangled.

A remarkable illustration of the operation of this psychological trap was recently unfolded in the exposure of the "Drake estate" fraud in the Chicago courts when it was revealed that 70,000 residents of mid-western States had contributed a total of \$1,350,000 to a group who represented they held claims to the Sir Francis Drake estate, consisting of incredible wealth in Great Britain plus title to debts owing the estate in 66 countries of the world with compound interest which had been piling up for 300 years. It was represented that those who would contribute funds to enable the group to settle up the estate would reap a thousandfold in their investment.

Even after the ringleader was sentenced to a ten-year term in jail money continued to roll in to his agents who collected on a commission basis. The alleged efforts to "collect the estate," evidence in the trial of 41 of these collectors revealed.

Wild stories were told at campaign meetings and, judging from the resultant flow of money, believed. Prospects were told that all the silver and gold in the world really belonged to the estate, which was why the United States began calling in both why England departed from the gold standard, that when Roosevelt was reported on a fishing trip he was actually in England settling the estate and that the ringleader was not in jail but was waiting to release a secret understanding with the Bank of England, and when told the Drake estate had been settled long ago, "repeated his plaintive query, "What steps do I take to get my money?"

It reads like a fairy tale, but it is opportune to point out that for this one scheme which received a great deal of publicity, there are hundreds of others to which the unsuspecting public is invited to subscribe, about which not much is heard.

Such appeals are invariably launched on the well-founded assumption that there are still plenty of people gullible enough to part with their money if the bait is made sufficiently glittering in the form of handsome returns at short notice.

Those who are tempted by such blandishments would do well to hesitate before taking the plunge into dubious waters and particularly to be wary of glittering promises of speedy and handsome returns. Money is not made that way, except by the few who are out to "take the suckers for a ride."

For the average man or woman there is just one reasonably safe way to ensure a competence for old age and that is by the slow and painful route of hard work, thrift and investment of savings in sound securities, remembering that the sounder the security, the smaller will be the return. Such method requires courage, persistence, self-denial, endurance and intelligence, but it is the only rational way, for there is no royal road to riches.

## BANISH RHEUMATISM

**Take PHOSFERINE.** Thousands endorse this great British tonic for the quick, sure way it ends rheumatic aches and stiffness, and soothes the nerves. PHOSFERINE builds you up. Gives you new energy. Helps you to sleep like a log. Start with PHOSFERINE now—just a few tiny, economical drops each day.

## Robbed Press Of Headline

Prince Of Wales Had Fair Papers Did Not Get

St. Hon. Basil Dandridge, government leader in the Senate, told the Red Chamber how King Edward as Prince of Wales "got even" with newspapers for publishing pictures of him thrown by horses.

The Senator described a meeting with the Prince in 1927 and a discussion of horse racing in which the Prince said he had no more falls than the average rider but that "terrible photographers had him in the press all the time."

"I once got even with them," he quoted the Prince as having told him. "I robbed them of a big lead line. On the polo grounds at the other end of the field, far away from the clubhouse, I was knocked down by a mallet stroke which grazed the eye and made a gash on the eye-lid. My shirt was covered with blood. I was picked up and driven to a near hospital where I was given three stitches. If reporters had been at hand the world would have been told I was dead."

There are more people to the acre in Barbados than on any other spot in the western hemisphere. 2140

## Russia's Communal Kitchens

Preparation of Food Is Done Entirely By Machinery

Twenty-one million Russians are being fed to-day from communal kitchens. Last year they consumed ten billion dishes. During the past six years the number of persons served from such kitchens has increased by 20 times; and the service is still growing. One kitchen now in course of construction will be capable of preparing 450,000 dishes a day. The preparation of food in these organizations has become so highly mechanized that the food is not touched by human hands during the whole process.

## Learned Too Quickly

Robot Narrowly Missed Killing Its Tutor With Gun

A new trick that he was adding to his mechanical man's repertoire at the Pacific International Exposition in San Diego, California, almost cost the life of Henry C. May, inventor.

May was trying to teach the robot to shoot a revolver. The mechanical man learned many things quickly, anticipated, and shot him in the head. He will recover.

**BETTER USE GILLETTE'S LYE AND FLUSH OFF THE STAINS**

**NO NEED TO RUB AND SCRUB**

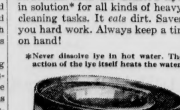

Gillette's Pure Lye takes off those ugly yellow stains and won't harm enamel or plumbing. Once a week pour it full strength down toilet bowls and drains. It kills germs, banishes odors as it cleans. Frees trap and drainpipe from obstructions. And use Gillette's Lye in solution for all kinds of household cleaning tasks. It costs dirt. Saves you hard work. Always keep a tin on hand!

Never dissolve lye in hot water. The action of the lye itself heats the water.

**FREE BOOKLET—The Gillette's Lye**

Booklet tells dozens of ways this powerful germ and disinfectant makes household work easier. Also how to make good use at home and gives helpful information for all kinds of cleaning. Write for a free booklet to The Gillette's Lye Co., Free Ave., St. Louis, Mo.

## May Build Salt Refinery

Test Drilling Will Start Soon At Salt Beds In Alberta

Erection of a \$750,000 salt refinery at McMurray, Alberta, in the spring will be carried out by a new company, according to F. J. Batchelor of Cornwall, Ontario, head of the new firm, who recently returned from a week's inspection trip at the salt beds.

A diamond-drill crew will commence operations as soon as the cold snap breaks in the north and will continue test drilling until spring on the property leased from the provincial government, said the former Calgary bank manager.

If present indications of the extent of the salt bed are confirmed, the refinery will be constructed in the spring. Mr. Batchelor said. Plant will have a production of 30,000 tons of salt a year and will employ in the neighborhood of 40 men.

Questioned regarding a market for the product, Mr. Batchelor stated Alberta alone consumes from 30,000 to 32,000 tons yearly.

Central western provinces use 10,000 to 20,000 tons a year. Plant will be confined to manufacturing table salt at the outset and will branch into various grades later. The salt is mined by drilling and pumping the salt to the surface in the form of brine. The brine is evaporated in the refinery.

Refinery will be erected beside the railway at McMurray and if necessary the brine may be piped from wells some distance away.

Production is expected to commence by next September.

## Taxed Captain's Skill

Locomotives Broke Mooring In Storm And Jumped About Deck

To his four 72-ton locomotives dance about the deck of a little tramp steamer in a monsoon on the Indian Ocean, was the experience of Captain H. Nyegaard, master of the Othander. He told of his perilous trip on arriving at Singapore, Malaysia. The locomotives were on their way from Alsace-Lorraine to China and were strapped to the deck with heavy chains. Their 30-foot tenders were in the hold. The terrific wind sent wave after wave over the little vessel until he was practically under water. Suddenly, Captain Nyegaard said, the locomotives lifted and jumped about as if they were the chairs of a circus party. For several hours the ship had to be maneuvered to keep it above water and the locomotives on deck. Stopping at Bombay Captain Nyegaard had the hindings renewed.

## Smoke Drift Of London

Reports Would Indicate It Travels For Long Distance

That smoke originating in England is being observed in other parts of Europe was reported at the annual conference of the National Smoke Abatement Society in Bristol, England, by Dr. A. G. Ruston of Leeds University. "Smoke from industrial England has been observed," he said, "as far west as Iceland, on the West coast of Ireland; the smoke drift of London is frequently seen by air pilots over the Channel and Northern France; a soot fringe on the edge of Coniston Water—derived from Lancashire and the West Riding of Yorkshire—has been photographed; and it has been alleged that the sheep on the Isle of Man are darker in color when an east wind blows across from Lancashire."

## An Unusual Sale

Railway In New Brunswick Bought \$100,000 At Auction

The Canadian Vapeur railway, running 26 miles from Perth Junction to Plaster Rock, was sold for \$100,000 to St. Ronald Jones and E. B. Harley, Saint John, at a public auction, unique in Canada's history.

In 1897, the year of its completion, the railway was leased to the Canadian Pacific railway for 99 years, and rental from the C.P.R. will be the only source of revenue for the purchasers for the next 60 years.

## Snow And Apple Blossoms

'So much snow has fallen in the region of the Zugspitze Mountain, in Upper Bavaria, that skiing has already become possible. And down in the valleys chestnuts and apple trees have just burst into bloom for the second time this year.

A publication issued by the Forest Service of the Department of the Interior indicates that the forests of Canada supply over half the raw material used in the world for the manufacture of rayon or artificial silk.

The PERFECT Chewing Tobacco

## SELECTED RECIPES

### CARAMEL NUT PUDDING

- 1 cup brown sugar
- 1 cup Crown Brand Corn Syrup
- 1/2 cup boiling water
- 2 cups scalded milk
- 4 tablespoons Benson's Corn Starch
- 1/4 teaspoon salt
- 1/2 cup cold milk
- 2 eggs
- 1/2 teaspoon vanilla

Melt the sugar to caramel; add the boiling water gradually; cook until it is fairly thick. Mix the Benson's Corn Starch, Crown Brand Corn Syrup, salt and cold milk. Add gradually to the hot milk in a double boiler. Stir constantly and as mixture begins to thicken add caramel. Cook 45 minutes, stirring every 10 minutes. Add the yolks of the eggs which have been well beaten. Cook again for three minutes. Add flavoring and pour into a greased baking dish. Top with the following meringue.

- 2 egg whites stiffly beaten
- 2 tablespoons fine fruit sugar
- 1 tablespoon Benson's Corn Starch
- Sprinkle with salt and brown in the oven. Chill and serve.

## Size Remains The Same

An anthropologist reports that the human brain has not increased in size since the days of Neanderthal man who lived in the Old Stone Age; and brains have decreased, in size, in Europe at least, within the past 10,000 or 20,000 years.

## Safety-At-Sea Service

Reports received from four liners on the Atlantic denied reception of complete weather maps by radio facsimile had been successful, according to Charles Pannell, president of the Radiomarine Corporation of America, which has just started the new safety-at-sea service.

## NO MORE Stomach Trouble!

Now can eat anything without pain or after effects.

"For a long time I suffered badly from indigestion. I tried many remedies but got worse until I started Fruit-A-Tives. Then it was not long before I was well and could eat anything without pain or after effects."—says Mr. S. S. Simpson, Toronto, Ont.

Fruit-A-Tives are a famous doctor's prescription for indigestion, constipation, flatulence, acidity, heartburn, headache, dizziness, nervousness, and all the ailments of the stomach and bowels. They are made of APPLES, ORANGES, PEACHES, PLUMS, and HERBS. That is why Fruit-A-Tives act so naturally to bring all the organs of elimination to health, why they help you, why they bring, not temporary, but lasting relief.

## FRUIT-A-TIVES

Nature's Fruits and Herbs

At what bedtime nasal irritation, sniffs or sneezes, use Vicks Vapo-rub. Vapo-rub is especially designed for the nose and upper throat—where most colds start. Used in time, Vapo-rub helps to prevent many colds—and to throw off head colds in the early stages.

3. To Help End a Cold Sooner If a cold has developed, or strikes without warning, rub throat, and chest at bedtime with Vicks Vapo-rub. Vapo-rub acts two ways at once: (1) By stimulation through the skin, like a poultice or plaster. (2) By inhalation of its penetrating medicinal vapors, which inflames the passages. Through the night, this combined vapor-poultice action keeps phlegm, soothes irritation, helps break congestion.

What Vicks Plan can do for others has been indicated not only in clinics, but also in the further part of every day home use by thousands. What it can do for you and your family can be proved only by trying it. Directions for following the Plan are in each box. Vicks Vapo-rub can be used in three simple steps:

1. To Help Build Resistance to Colds Use normally—avoid excess. Eat simple food and keep elimination regular. Drink plenty of water. Take some exercise daily. Outdoors, preferably. To help prevent rest and sleep.

2. To Help Prevent Many Colds At the first warning nasal irritation, sniffs or sneezes, use Vicks Vapo-rub. Vapo-rub is especially designed for the nose and upper throat—where most colds start. Used in time, Vapo-rub helps to prevent many colds—and to throw off head colds in the early stages.

What Vicks Plan can do for others has been indicated not only in clinics, but also in the further part of every day home use by thousands. What it can do for you and your family can be proved only by trying it. Directions for following the Plan are in each box. Vicks Vapo-rub can be used in three simple steps:

1. To Help Build Resistance to Colds Use normally—avoid excess. Eat simple food and keep elimination regular. Drink plenty of water. Take some exercise daily. Outdoors, preferably. To help prevent rest and sleep.

2. To Help Prevent Many Colds At the first warning nasal irritation, sniffs or sneezes, use Vicks Vapo-rub. Vapo-rub is especially designed for the nose and upper throat—where most colds start. Used in time, Vapo-rub helps to prevent many colds—and to throw off head colds in the early stages.

3. To Help End a Cold Sooner If a cold has developed, or strikes without warning, rub throat, and chest at bedtime with Vicks Vapo-rub. Vapo-rub acts two ways at once: (1) By stimulation through the skin, like a poultice or plaster. (2) By inhalation of its penetrating medicinal vapors, which inflames the passages. Through the night, this combined vapor-poultice action keeps phlegm, soothes irritation, helps break congestion.

airy shelter which provides protection from heat and flies.

In raising calves, the two great dangers of overfeeding and filth are never forgotten. To avoid the first danger, an attempt is made to feed just enough to provide for the calf's requirements for normal growth and at the same time keep his appetite keen, and it is here that the feeder's skill in gauging the requirement of the individual calf is important. The second danger, that of filth, and one all too often forgotten is avoided here by feeding fresh, warm milk and by washing and scalding all calf pails in just the same manner as the milk pails. In addition the calves' quarters are kept clean and dry. By these simple precautions with regard to overfeeding and filth, trouble from scours is almost completely eliminated.

The tentative feeding schedule used here is as follows: For the first 3 days the calf is given the dam's milk, as this first milk, or colostrum, while unfit for human consumption, is necessary to cleanse the calf's bowels and start digestive functions. During the next ten days fresh, warm whole milk is fed two or three times a day, and the daily allowance gradually increases to about 12 pounds. During the third week, an eighth of a pound per day of a grain mixture is introduced, and at the same time, part of the whole milk is gradually replaced with skim milk. At one month of age most calves are receiving straight skim milk, about 12 pounds a day, and 1 pound of grain. From the 5th to the 12th week, the skim milk is increased to 16 pounds and the grain to 2 pounds per day. At 6 months of age, a satisfactory feed

Mrs. R. I. Baker is attending the W. I. convention in Lethbridge.

Big Bottle Pancake Syrup and pkg. Pancake Flour all for 40c at Campbell's.

Miss F. Woodhull, R. N. is resting at her home, following a severe attack of the flu.

Mrs. Lamont returned home on Monday from Drumheller where she has been the house guest of Mrs. McCullough for the past two weeks.

Half dozen Grapefruit and a dozen Oranges all for 45c at Campbell's.

Feed is now being hauled out on to the farms in the form of hay, oats and barley which has been shipped in, about twenty tons in all, and has been handled through Fred Watts at the Pool elevator.

is usually about 20 pounds of skim milk and 3 lbs. of grain per day.

Two grain mixtures are used: First-Up to 2 months of age: whole oats 2 parts, bran 1 part, and ground flax 2 per cent. Second-from 2 to 6 months: ground barley 100 parts, ground oats 100 parts, bran 100 parts, ground flax 12 parts, and bone meal 3 parts. The ground flax in addition to being a good source of protein, is rich in fat and so helps to compensate for the fat deficiency resulting from feeding skim milk.

Good quality alfalfa hay is fed as soon as possible, but only small amounts are fed at each feed as this helps to prevent staleness and over-feeding.

A mineral of equal parts of salt and bone meal, or of 60 parts of salt and 40 parts of monocalcium phosphate is self-fed from a mineral box.

Fresh water is supplied daily as the milk does not supply all the liquid required.

## Local & General

Miss Schultz spent the week end in Lethbridge.

Mrs. Guy Voisey is visiting in Lethbridge, the guest of Mrs. Young.

H. Lamont returned from his holiday spent in the Southern States.

Joe McNaughton who has been visiting in Calgary returned home Wednesday.

Robin Hood or Quaker Rolled Oats 10c pkg. at Campbell's.

Geo. Mark's friends will be pleased to hear that he is home after being a patient in the Vulcan hospital.

Miss Robinson of the school staff left for Calgary on Saturday. Mr. Hart of Black Diamond will finish the term.

The Laid Chapter, (the newly formed I O D E) is having a tea at Jensen's Bakery Saturday afternoon, March 7th. Come and support the girls.

Lovely Tulips, will bloom in 20 days. Big strong plants out of pots, 2 for 25c at Campbell's.

The other day there was a woman down town with two different kinds of ear rings on. We have been wondering if that is the latest or if she just got trendy in a hurry and made a mistake.

Just arrived, new Fresh shipment of Superior Coffee in the big 3 lb. pails that everyone wants, \$1.00 each at Campbell's.

Mrs. U. S. Alexander presided over a number of pupils writing their Theory in music at her home February 15th. There were some from Vulcan and also a number of Miss Margaret Patterson, A. T. C. M. pupils of Champion.

F. G. Beaumont, Barrister of Carmichael will be at the Chronicle office every Tuesday morning.

John Deere plow, 4 bottom with power lift and engine hitch, must be in A1 shape. Write Box 98, Nanton.

Now that the Dominion Government has decided to apply the principle of a minimum price to a portion of the wheat crop 1930-31, the principle should be extended to all farmers who sold wheat during that year, according to a statement made by Mr. R. S. Low, President of United Grain Growers Ltd. last week. Mr. Low's statement was as follows: "According to announcement which has been made at Ottawa, the Dominion Government has decided to apply the principle of a minimum price to a portion of the wheat crop of 1930-31 and give to a portion of the farmers who sold wheat that year the benefit of a minimum price of 60c a bushel. United Grain Growers has decided to call to the attention of the Government the desirability of extending equal treatment to all western farmers and of applying the minimum price principle to all the wheat crop of that year. That would mean giving to those farmers who sold their wheat on the open market those no less when the price ranged between 50c and 60c a bushel the minimum price of 60c. Customers of this company who are in that position look to us to make representation on their behalf to the Government and a number of them have already called on us to do so. Undoubtedly the feeling will be very strong that there should be no discrimination and that the equality of treatment should be provided."
